2021-02-18 by nikse.dk | View comments (8)

Subtitle Edit 3.6.0 has landed.

Many new settings regarding appearance, like dark theme, syntax coloring in text box. The "source view" is now hidden by default which gives a little more space for the list view. It's possible to toggle between "source view" and "list view" by 'F2' (or context menu). New SE icon by Leon Cheung ->

Also check the new bd .sup file editor.

Important note: This version of SE uses .NET framework 4.7.2 (or 4.8), which means that WinXP and Vista are no longer supported.

Enjoy :)
